# Frequently Asked Questions

## 1. What is a dental assessment?

Similar to hearing and vision screenings, the oral health assessment takes no longer than 5 minutes to look for signs of tooth decay or infection by a licensed dental professional at no cost to you.

## 2. Who can complete a KOHA (Kindergarten Oral Health Assessment) Form?

Any dentist, dental therapist or registered dental hygienist licensed in Michigan can complete the form.

## 3. What is the KOHA Form? What do I do now?

Children starting Kindergarten, or their first year of school, must have a dental assessment completed. My Community Dental Centers are collaborating with the Kent County Health Department to offer oral health assessments in schools. If your child has already had their oral health assessment, please submit the completed form to their school. For those who complete the assessment at school, a list of students who participated will be provided to the school. If your child received an assessment during a community-hosted event, kindly return the completed dental assessment form to their school.

## 4. What if my child needs additional care?

If additional follow up is recommended, please refer to the list of providers on the other side of this sheet. These dentists are accepting new patients and provide dental care to children.

## 5. Childhood tooth decay is the most common chronic disease in children

Tooth decay, or the presence of childhood cavities, is by far the most common chronic childhood disease. It's five times more common in children than asthma! The good news is that it's also one of the most preventable diseases.

## 6. What if I cannot afford to take my child to the dentist?

Assessments will be provided at no cost to you. There are a variety of ways to have kids in Michigan seen by a dentist or dental professional. Consider enrolling in Michigan's Healthy Kids Dental Program and contacting your Local Health Department for help finding a dental home.

Visit Michigan's Healthy Kids Dental Program: <https://www.michigan.gov/mdhhs/assistance-programs/healthcare/childrenteen/hkdental>

## 7. How can I find a dental home for my entire family?

You can refer to the list of dentists on the back side of this sheet or find a dentist via your insurance provider and zip code by visiting [deltadental.com/us/en/member/find-a-dentist.html](http://deltadental.com/us/en/member/find-a-dentist.html)

## 8. Do my older children have to have a dental screening too?

This law is specifically for children entering Kindergarten, but it is highly recommended that all children see a dentist at least twice a year.
