

Helping Students Build Success Stories

Michigan Department of Education Office of Health and Nutrition Services School Nutrition Programs

### **Local Wellness Policy: Triennial Assessment Summary**

#### Background:

The Healthy, Hunger-Free Kids Act of 2010 requires Local Educational Agencies (LEAs) to update or modify their wellness policy, as appropriate. When wellness committees meet on a regular basis throughout the school year, an assessment plan should be used to ensure progress is being made on the district's wellness policy and procedures.

#### Purpose:

The template below is offered to help summarize the information gathered during your assessment. Members of a school wellness committee who are completing the triennial assessment for their school wellness policy may use this template. It contains the three required components of the triennial assessment, including 1) compliance with the wellness policy, 2) how the wellness policy compares to model wellness policies, and 3) progress made in attaining the goals of the wellness policy.

#### Results:

The copy of the assessment must be made available to the public. How the assessment is made available is the decision of the LEA. Many LEA's choose to post the results on their district website. The triennial assessment summary and the assessment details must be shared.

### Recordkeeping:

Keep a copy of the most recent triennial assessment, along with supporting documentation on file. This will be needed when you have a School Nutrition Program administrative review.

|                                                                        |    |

Describe how your wellness policy compares to model wellness policies.

The BCPS was written to model the MDE Wellness Policy.

The BCPS policy has goals in each of the following categories

- Nutrition Education
- Promoting Nutrition
- Standards and Nutrition Guidelines for all foods and beverages
- Food and Beverage Marketing
- Physical Activity and Physical Education
- Other School based Activities that Promote Student Wellness
- Implementation, Assessment, Documentation and Updates

Amendments that need to be made when we update the policy would include more detailed "smart goals" Specific measurements and timelines listed in the triennial assessment form are listed in the BCPS wellness policy but were included if the actions taken already happened or are in progress to get the intended action completed.

## Section 4. Compliance with the Wellness Policy and progress towards goals

At a minimum, local wellness policies are required to include:

- Specific goals for:
  - o Nutrition promotion and education
  - o Physical activity
  - o Other school based activities that promote student wellness.
- Standards and nutrition guidelines for all foods and beverages sold to students on the school campus during the school day that are consistent with Federal regulations for school meal nutrition standards, and the Smart Snacks in School nutrition standards.
- Standards for all foods and beverages provided, but not sold, to students during the school day (e.g., in classroom parties, classroom snacks brought by parents, or other foods given as incentives).
- Policies for food and beverage marketing that allow marketing and advertising of only those foods and beverages that meet the Smart Snacks in School nutrition standards.
- Description of public involvement, public updates, policy leadership, and evaluation plan.

Using the table below to indicate the progress made with each goal included in the Wellness Policy. The table may be used for each school separately or the district as a whole.

**Tip:** When developing a wellness plan, ensure activities are meeting goals by developing SMART objectives:

- **Specific:** Identify the exact area to improve.
- Measurable: Quantify the progress.
- Attainable: Determine what is achievable.
- **Realistic:** Consider resources and determine what can reasonably be accomplished.
- **Time bound:** Identify deadlines for goals and related tactics.

The Centers for Disease Control and Prevention (CDC) has tips for developing **SMART objectives**.
